SARTI ENGINEERING

PROJECT- STRUCTURAL ENGINEERING- CONSULTING

Studio Sarti was born in September 1979.

Its main office is in Rimini, a logistics site in Rome and one in Dubai.

The core business of the Firm is structural engineering, however in the course of the planning activity a broad focus was also devoted to projects of significant architectural value, contextually obviously to the related structural aspect. The Firm then, availing itself also of valid and by now consolidated external collaborators, offers, if required, to its customers a global and multidisciplinary approach (integrated planning service alias "turnkey") to the Job Order, from the feasibility study, to the integrated planning structural, architectural and plant engineering with relative General Works Management, Design and execution safety, research, consultancy, technical-economic adequacy assessments, topography, interior design, relations with control bodies, etc.

The Firm is composed of employees and collaborators who carry out their activities mainly within the organizational structure coordinated by Ing. Sarti, first person. This dynamic organizational structure guarantees the client careful and punctual control of the various design phases, rather rapid execution times and a high quality level.

In the course of its history the Studio has realized and is carrying out projects for both public and private works in Italy and abroad, collaborating with famous architects of the national and international scene, as well as at the service of international Clients and Companies.

Eng. Gilberto Sarti served as Safety Coordinator in the Design, Execution and Work Responsibility phases, for jobs of considerable importance and for internationally renowned Clients. We mention only by way of example: EUR SpA, Ferrari SpA, Marr SpA, Ceramica del Conca SpA, SCM Group SpA, Cremonini SpA Group, Coop Alleanza 3.0, Hera SpA, Mugello Circuit SpA, Italian Exhibition Group SpA, Ministry of the Environment and the Republic Lithuanian during Expo 2015 and many others.
